

# THE SECURE EMAIL PLATFORM

## Solution Brief

Three thin, dark grey lines originate from the left side of the page and converge towards the right side, creating a sense of depth and movement. They are positioned in the lower half of the page, above the Retarus logo.

retarus:

# Secure Email Platform. The Next Dimension of Business Email.

- Module
- Add-on module
- Standalone option w/o cloud gateway
- Planned standalone options w/o cloud gateway
- Planned: existing 3rd party can be integrated
- *Performance*: email relay, traffic management, queuing, throttling, large email handling
- *Protection*: backscatter, inbound DDoS, outbound anti-virus
- *Management*: quiet time, email signature/footer, live search, address rewrite, (user based) routing

## FOR SECURITY

### High-End Protection with Modular Options.

- Highest detection rates and security level
- Patented, self-developed technologies
- Integration of leading threat-prevention providers
- Works with all (cloud) email systems
- Pay-per-use and billing based on mailboxes

#### Essential Protection

- Anti-virus multi-scan
- Anti spam engine, phishing filter, spoofing protection
- Inbound traffic management

#### Advanced Threat Protection

- Extended anti-virus multi-scan (4x)
- Instant time-of-click protection
- CxO fraud detection

#### Postdelivery Protection

- Patient Zero Detection (PZD)
- PZD real-time response
- Patented technology

#### Forensics

- Provides real-time forensic data (events)
- Supports all major SIEM tools
- Access via protected interface

## FOR COMPLIANCE

### Also for Sensitive Environments.

- Local data processing in Retarus' datacenters
- Protect sensitive business information
- Increase adoption of encryption
- Device-independent (mobile & desktop)
- Granular admin rights

#### Archive & Backup

- Real-time archiving (internal/external emails)
- Also available for MS 365
- Access & change logging, fast search

#### Encryption

- Key-based encryption (S/MIME, PGP, OpenPGP)
- Password-based encryption
- Consistent in-transit encryption

#### Data Loss Prevention

- Pattern recognition for external emails
- Definition of permitted senders/recipients
- Alerts and transparent monitoring

## FOR APPLICATIONS

### Email Delivery at its Best.

- World-class delivery rates and performance for application emails
- Add email API to MS 365 / Google Workspace scenarios
- Central email gateway for any business application (SMTP/REST API)
- Guaranteed throughput / bandwidth (SLA)
- Real-time monitoring

### Transactional Email

- Scales immediately for high-peak traffic
- Reputation management and routing
- Attachment encryption and virus check

### Bounce & Response Manager

- Add-on for inbound traffic
- Manages, organizes, and routes email replies
- Traffic handling for marketing, support, and contact center

### Trace & Recover

- Retention of emails to/from applications
- Re-processing of emails “lost” in workflows
- Monitoring and search functionality

## FOR INFRASTRUCTURE

### Managing Complex Landscapes on Enterprise-Level.

- Maintain performance of infrastructure and processes
- Keep emailing in case of security issues, hardware failures or cloud downtime
- Stay independent of your own email infrastructure and MS 365/Google Workspace
- Gain active control over email traffic
- Support heterogeneous environments (cloud, on-premises, hybrid)

### Email Continuity

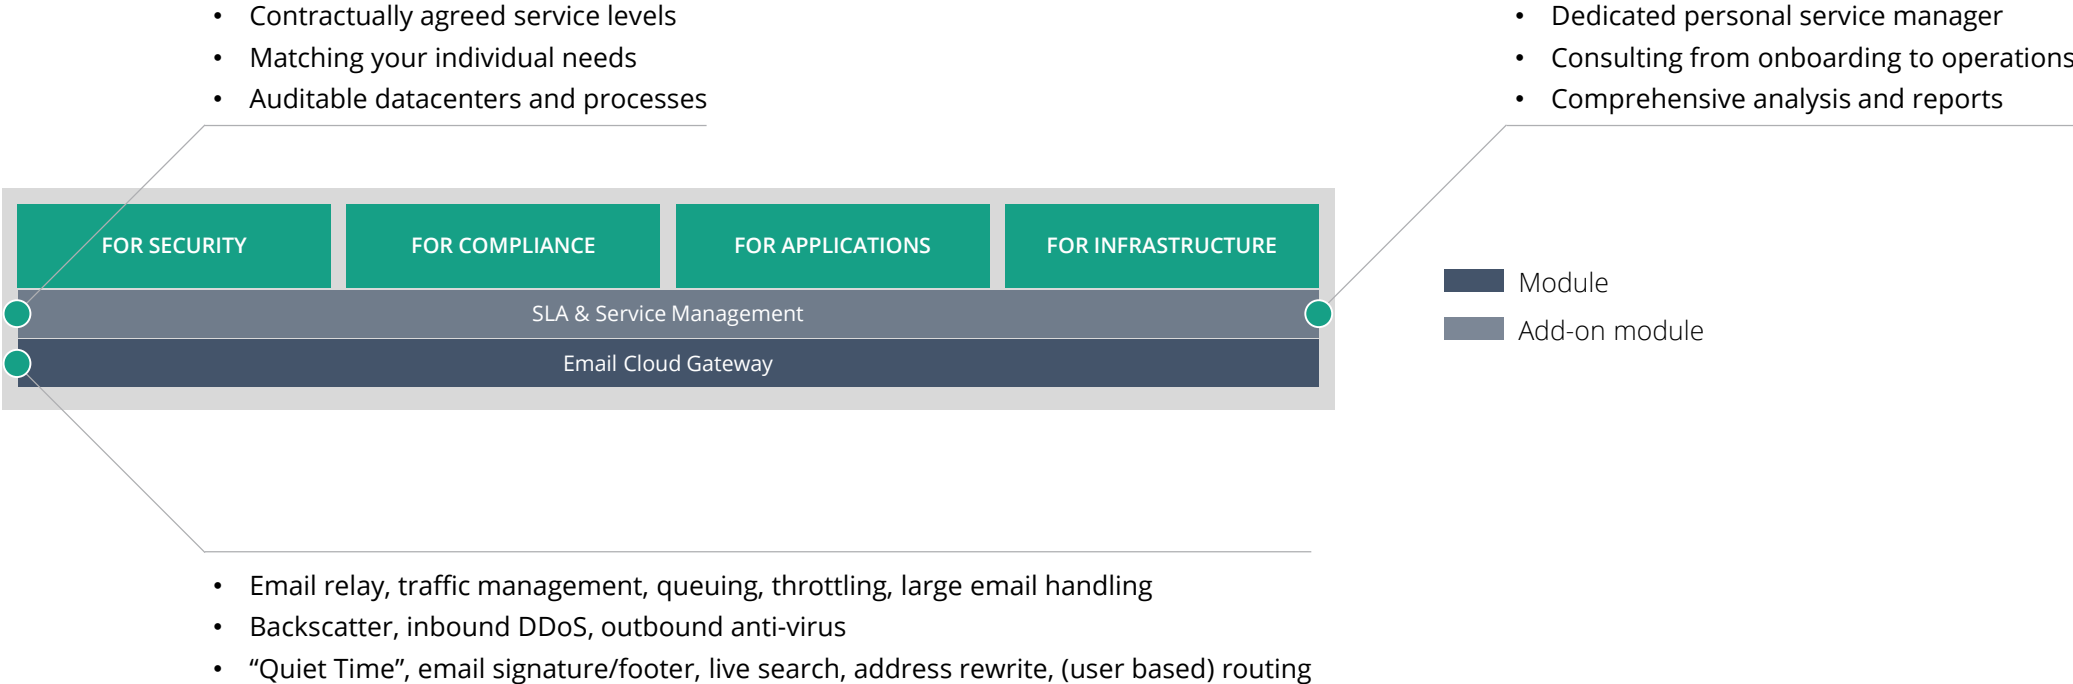

- “Active”, cloud-based webmail backup
- Ready-to-use, pre-provisioned inboxes and address book
- Intuitive, mobile-friendly

### Predelivery Logic

- Organize, edit and route emails based on custom rules
- Smart content analysis and workflow automation
- Fully cloud-based

## Your Benefits

- Replaces on-premise MTAs
- Ensures uninterrupted email traffic flow from different sources
- SLAs matching your individual needs
- Professional service management packages for highest operational excellence

**Modular:** Perfect solutions and additions for all aspects of the business communication channel no.1 – from a single source with flexible options

**Future-Proof:** Always at the cutting edge through both self-developed and market-leading technologies ("Best-of-Breed").

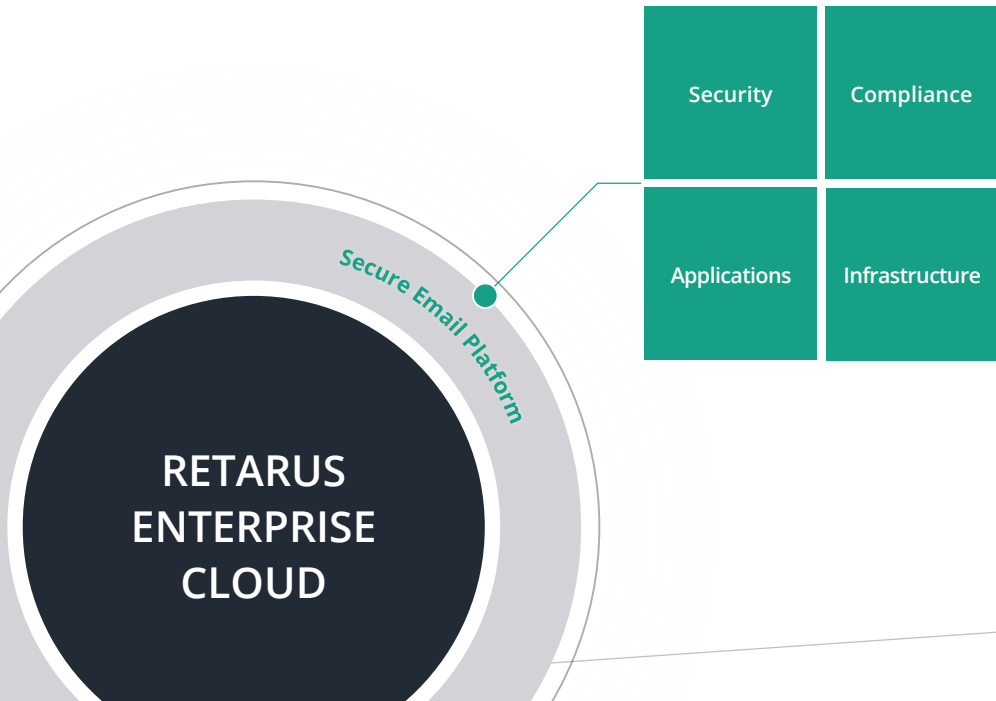

**Legally Compliant:** Processing in self-operated European data centers; no use of US-based hyperscalers. Headquartered in Germany, fully GDPR compliant, 100 % privately owned.

**Best Quality:** Unmatched processing time and highest availability – even contractually assured (SLA). 430+ specialists, including in-house support, are there to help even when things get tricky.

**Email DNA:** Retarus has been a true expert in email for nearly 30 years. With our patented solutions, we continue to actively shape the market.
